

Pipelyt — End-to-End Flow Diagram

User lands on pipelyt.ai → authenticates → onboards (DNA + OAuth + Stripe) → creates posts (manual or agent) → publishes or schedules → analytics sync. Rendered with Mermaid.

● User

● Frontend (React)

● Backend (FastAPI / Lambda)

● AI Agents (Gemini)

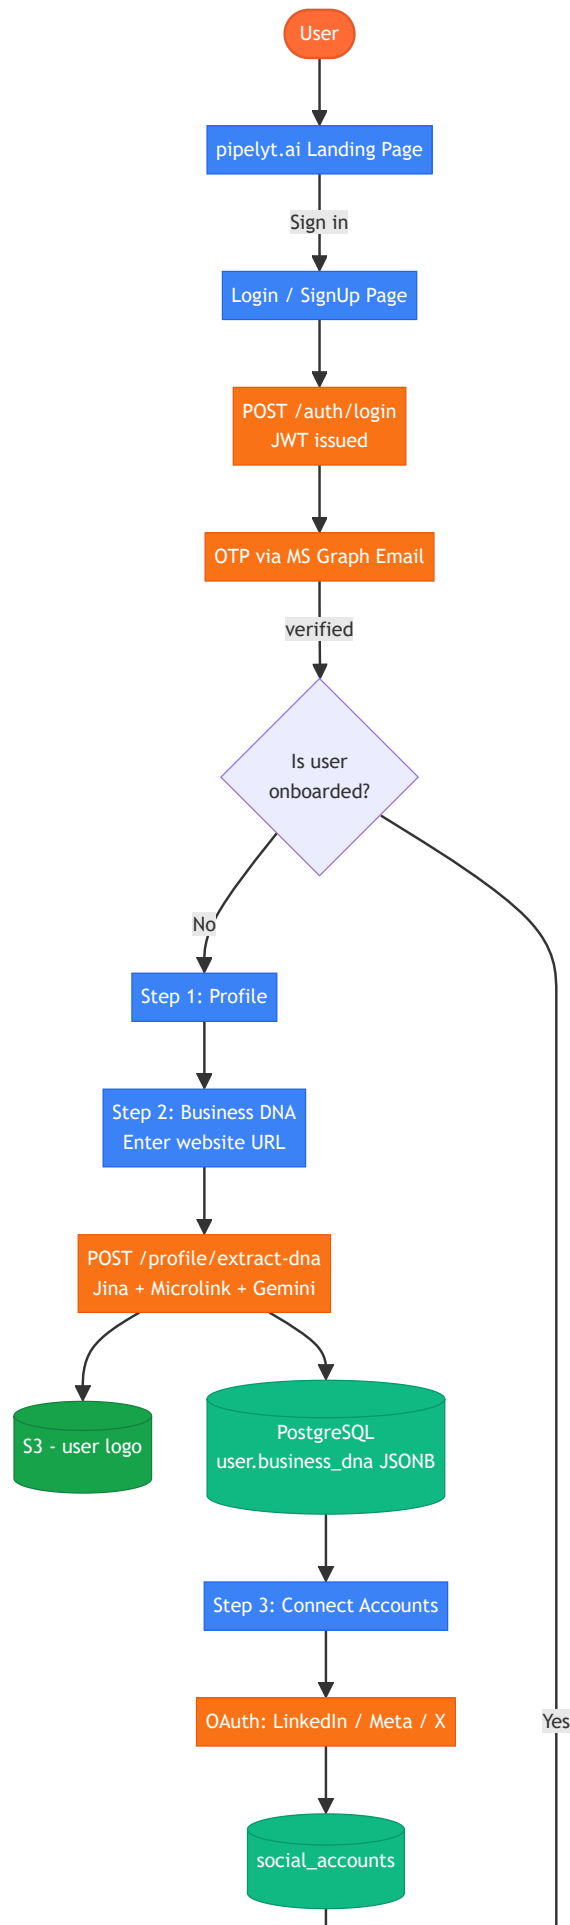

● PostgreSQL

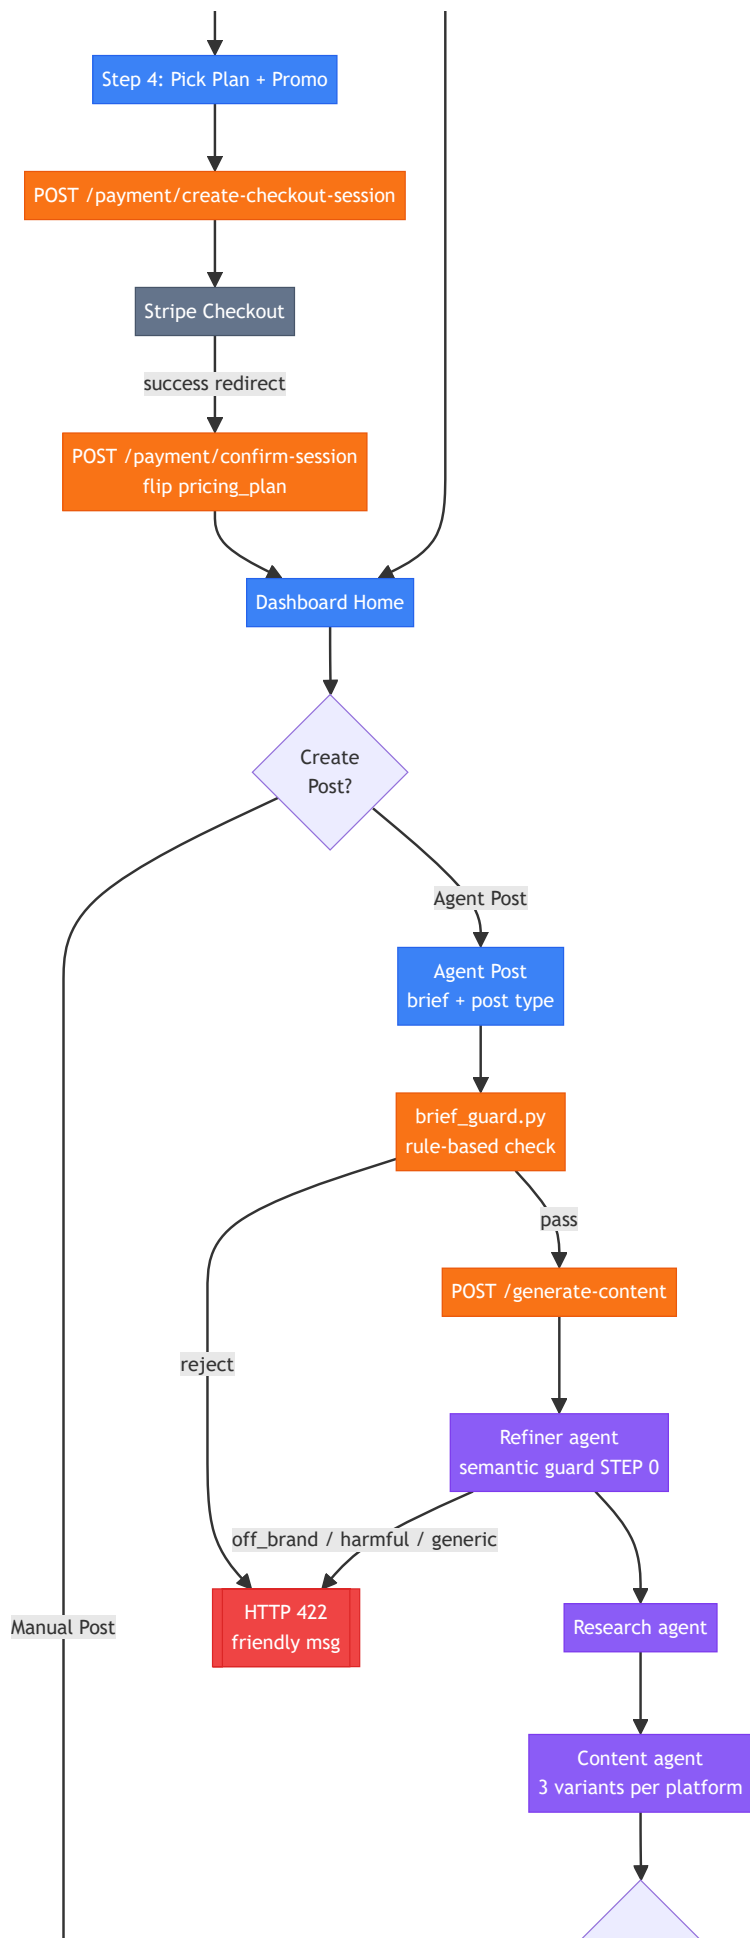

● S3 Storage

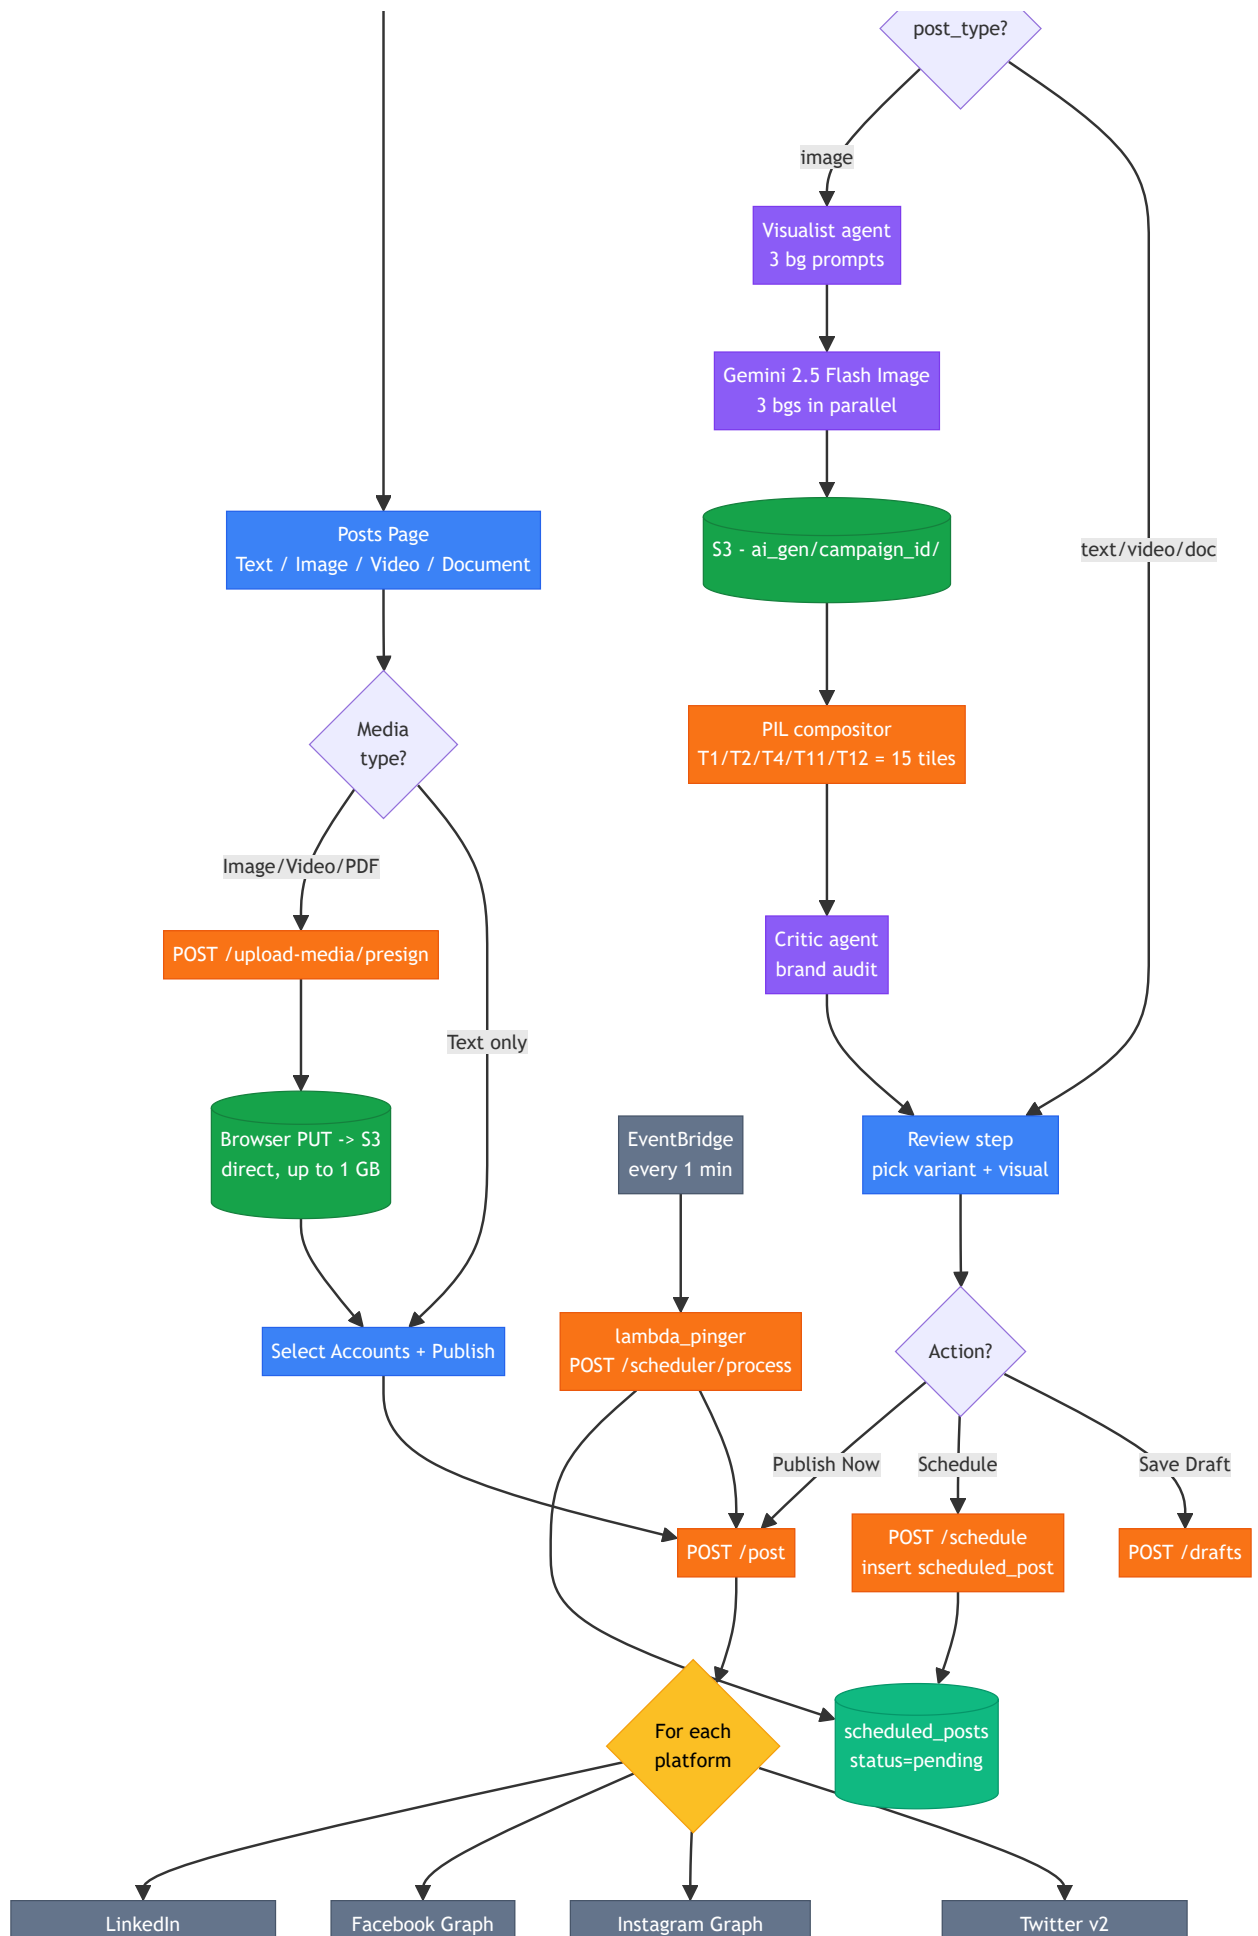

● External Services

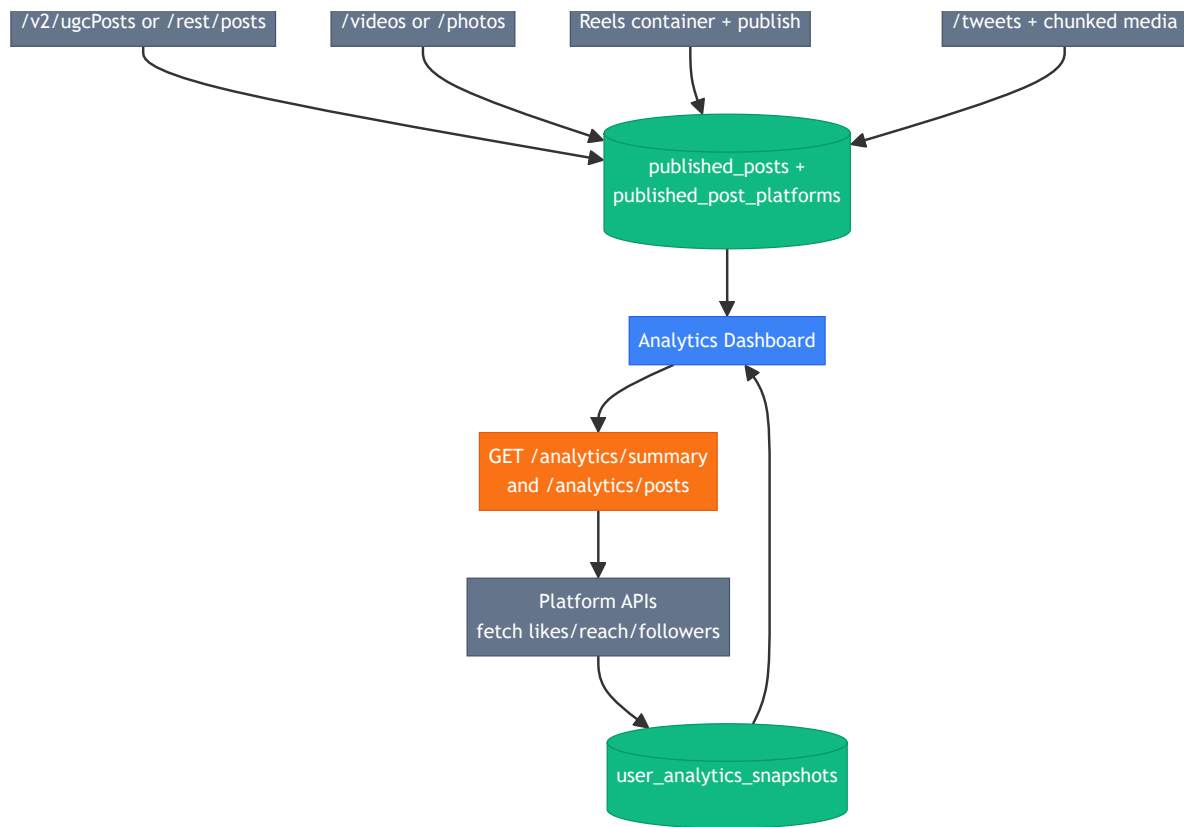

● Error / Reject

● Fanout

Pipelyt · End-to-end architecture flow · Source: `docs/PIPELYT_TECHNICAL.md` §4.0 · Open this file directly in any modern browser (no server required).

Export tips: SVG preserves vectors for Figma/Illustrator. PNG rasterises at 2× for decks. Print-to-PDF gives a page-friendly copy.
